

PENDING CONFIRMATIONS

Easy Connect Solutions Malaysia website content and launch checklist

Purpose: Confirm only the business facts that cannot be inferred safely. The website can continue development while these items remain unpublished or neutrally worded.

1. Retail and online-store information

- Full retail address for the Contact page, including postcode and unit/shop number.
- Google Maps share URL or embed location for the retail address.
- Official TechRevelo online-store URL, including whether the primary link should go to Shopee or another storefront.
- Short TechRevelo brand description approved for the Products and Contact pages.

2. Customer proof and case studies

- Approved customer testimonials with customer name, role, organization and permission to publish.
- Google review profile/link and the exact reviews approved for reuse.
- At least two completed projects suitable for case studies: client type, problem, scope, quantity, delivery and measurable outcome.
- Logos that Easy Connect has permission to display as customers or partners.

3. Compliance and service evidence

- Confirm whether data wiping is performed directly by Easy Connect or by a named qualified partner.
- Confirm whether NIST SP 800-88 and/or DoD 5220.22-M can be claimed, and provide the supporting process or partner evidence.
- Confirm whether Certificates of Data Destruction and chain-of-custody reports are issued, and at what scope: per drive, per device or per project.
- Confirm the approved wording for PDPA alignment/compliance.
- Confirm the downstream e-waste recovery partner and whether DOE-licensed claims can be published.

4. Commercial terms

- Warranty term by product category and grade, including whether 6-12 months is standard or optional.

- Corporate replacement/swap service: availability, geography, exclusions and the approved response time.
- Approved quotation turnaround and delivery-time wording.
- Minimum order quantities for bulk procurement and institutional pricing.
- Approved savings claims, including the evidence for 30%, 40% or other comparisons against new equipment.

5. Product and inventory details

- Final supported Apple range for the Editing page: MacBook Pro generations, iMac models and typical configurations.
- Confirm which gaming GPU generations are currently supportable in copy: RTX 30, 40 or newer series.
- Confirm whether Toshiba, Acer, Chromebooks and specific workstation models should remain in the permanent product copy.
- Approved grading definitions for Grade A and any other grades offered.

6. Marketing and operations

- Decision on WhatsApp chatbot implementation. The current site uses a direct WhatsApp link to +6011 2090 6561.
- Preferred CMS and publishing workflow for future blog articles; the current release keeps the static Resources structure.
- LinkedIn company-page URL when available; the current link is generic LinkedIn.
- Final scope and timing for Malay and Chinese translations across long-form inner-page content.

Current implementation decisions

- Remarketing has been removed from current navigation and search indexing because the audit explicitly requested its removal.
- Unverified guarantees and certifications are being replaced with neutral process wording until evidence is supplied.
- The contact form submits to info@easyconnect.my and the WhatsApp number remains +6011 2090 6561.
- No fabricated testimonials, client names, maps, retail addresses or store URLs will be published.
